## PRE-ANNOUNCEMENT

The newest generation of our  
**Magnesium Dosing Furnace**

**RAUCH MAGNESIUM MDO250E**

Dear Ladies and Gentlemen,

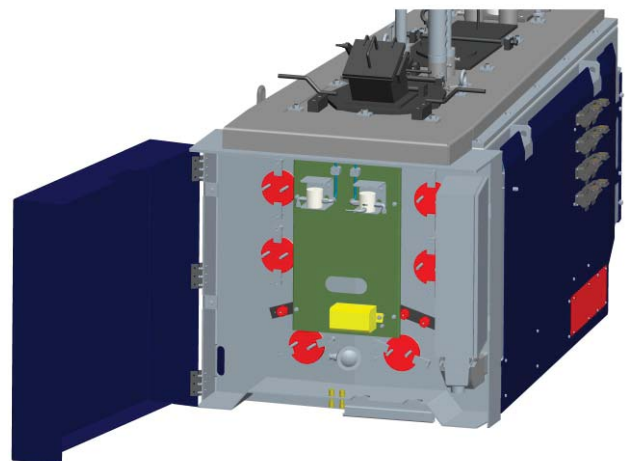

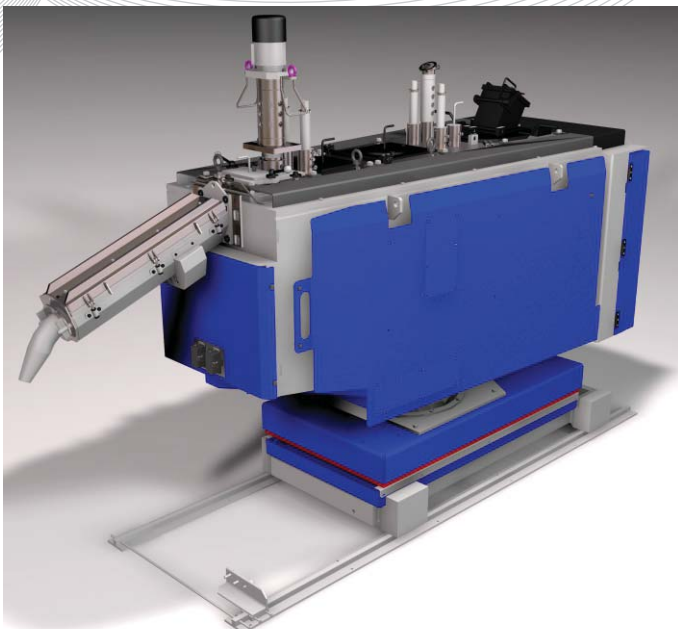

We would like to inform that our current generation of MDO250, successfully in use for many years across the world, has been updated and will replace the current generation.

All orders received after March 2015 are manufactured to the newest version. This new version is the culmination of our long time close cooperation with our customers in combination with our internal research and development.

**This new generation reveals the following advantages:**

- Improved protection of all wirings  
(to protect against external damages, extreme dirt and exposure to contamination)
- Minimization for biscuits by our newest pump technology
- Improved furnace insulation, thus reduced energy costs
- Improved ease of maintenance
- Improved safety concept
- New electrical control technology throughout
- Compatibility of spare and wear parts is ensured
- ...

Please contact us for a personal conversation and we will explain the new generation.
